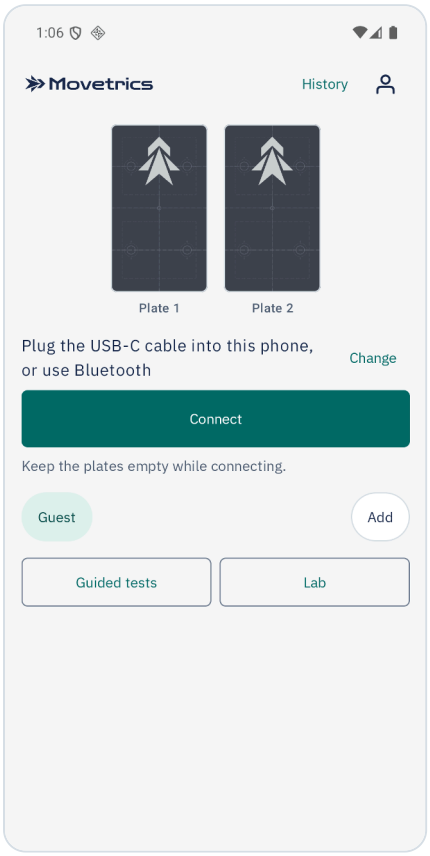
SOFTWARE FOR IPHONE, IPAD, MAC AND ANDROID

Movetrics app

Live forces and moments, guided tests and video beside the force curve, on a phone, tablet or Mac. Over USB-C or Bluetooth LE, and without internet.



The Movetrics app on a phone.

Live view	The force and moment components of every plate, as you move.
Guided tests	Countermovement jump, sit to stand, and Lift for counting squats and deadlifts, left and right.
Treadmill gait	Movetrics Gait: four F1-3D S under a treadmill, one FDT, walking measured step by step.
Video beside the force curve	Video is recorded only when you switch it on, and stays on the device unless you export it.
Your data	Recordings stay on the device. Export CSV, keep video as MP4, or upload to Movetrics Cloud when you choose.

WHAT YOU NEED

Devices	iPhone and iPad; Mac; Android phones and tablets with Android 8.0 or later
Connection	Bluetooth LE, or USB-C where the device supports it
Samples per second	Up to 2,000 with one or two plates; 1,000 with three or more
Languages	English and German

Intended use. Movetrics systems measure forces and moments, calculate metrics and display them, for sport, research, education, and practitioner-led training and rehabilitation. They are not medical devices. They do not diagnose, treat, monitor or predict any disease or condition, and their results do not replace professional judgement.
