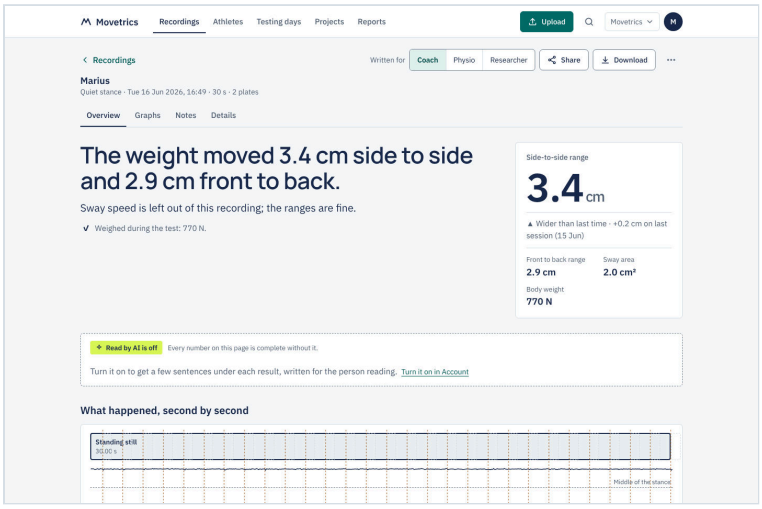
SOFTWARE IN THE BROWSER · ANY COMPUTER

Movetrics Cloud

Your recordings and results in one place, on any computer, with nothing to install. Every result names the method and version that computed it.



A result with its method and version. Example data.

No app required

Plug the FDT into a computer over USB, open Movetrics Cloud in Chrome, Edge or Firefox, and record live at up to 2,000 samples per second.

Already own plates?

Cloud reads files from most force plates: CSV, TSV and other text tables, Excel and C3D.

Results you can trace

Every result shows the method and version that computed it. Raw data and results download whenever you want.

OPEN TO YOUR OWN AI

Claude, ChatGPT and your own AI

Connect Claude, ChatGPT and other AI assistants through MCP, an open standard, and ask about your recordings in your own words.

Reads by default, changes only what you allow, and every change can be undone.

Right: an illustration with example data.

ASK YOUR OWN AI

Which athletes landed more evenly this month?

Athletes 03 and 07 landed more evenly in their last three drop jumps; Athlete 01 loaded the left leg more. Each value names its method.

Add a note to today’s jump: tested after a long run.

Done. You can undo it.

FREE TO START

Movetrics Cloud is free to start, with paid plans for more; most AI features are part of the paid plans. Measuring and exporting your raw data never need a subscription.

WHERE YOUR DATA LIVES

Your data is stored in the EU, with encrypted nightly backups in the EU. AI explanations are optional and processed in the US only with your consent. Partners see your data only when you invite them.

WHAT YOU NEED

Chrome, Edge or Firefox on a desktop computer for live capture; any modern browser for results. On iPhone and iPad, record with the Movetrics app.

Intended use. Movetrics systems measure forces and moments, calculate metrics and display them, for sport, research, education, and practitioner-led training and rehabilitation. They are not medical devices. They do not diagnose, treat, monitor or predict any disease or condition, and their results do not replace professional judgement.

Specifications may change. The current edition of this sheet is at movetrics.com/cloud. Questions: +49 15678 616 529 or contact@movetrics.com.
